

The TEN 25/30 range of reversible Plate Compactors are the best option to work on granular materials.

- › Different manufacturers petrol and/or diesel engines options.
- › Optimum frequency and amplitude for compaction.
- › Dead man system.
- › Eccentric system to easily adjust the belt tensioning.
- › Optional polyurethane sheet for paving stone compaction.
- › Optional transport system.

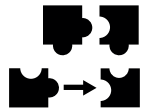

# TEN 25/30

## REVERSIBLE PLATE COMPACTORS

### + Absorption system

Designed for ergonomic work thanks to their vibration-absorbing handle.

### + Adaptability

The TEN 25/30 allows the adjustment of the tray through its progressive control, adjusting to all types of work.

### + Complete range

Complete range with different motorizations that adapt to each client.

### + Easy maintenance

Quick access to its different components, thus facilitating its maintenance.

## TECHNICAL DATA

MODEL	WEIGHT WITHOUT FUEL (Kg)	CENTRIFUGAL FORCE (Kg)	SPEED (m/min)	FREQUENCY (vib/min)	DIMENSIONS (WidexHighxLong)	PLATE LENGTH (mm)	ENGINE	FUEL	POWER (cv)
