

PNU internal pneumatic vibrators are the best option when an air compressor is available.

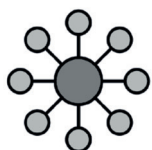

PNU

INTERNAL PNEUMATIC VIBRATORS

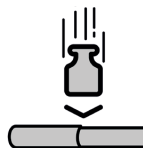

+ No electricity

PNU vibrators work with air compressors, no electricity is needed.

+ Versatility

Wide variety of needle diameters (up to 100mm) and transmission lengths to suit all types of applications.

+ Resistance

Designed and treated parts that provide long life to the poker.

+ Light and compact

Integrated equipment of small volume that allows great manageability.

- » Standard transmission length: 2m.
(Other lengths available upon request)
- » Recommended working pressure: 6 bars.
- » The valve does not require maintenance.
- » Aluminum handle.
- » Long life oil tank.
(Recommendation: refill at least once a week)
