

REN 650 hydraulic rollers are ideal for larger compaction jobs.

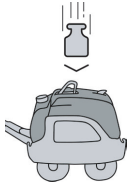

REN 650

HYDRAULIC ROLLERS

+ Maneuverability

Its small distance between axes facilitates the turning maneuvers of the machine.

+ Sturdiness

It is made up of a shockproof structure to protect the motor and extend its useful life. Thanks to the simplicity of RENs, maintenance is minimal.

+ Safety

Emergency control system that guarantees the safety of the user.

+ Optimized design

No side overhang for optimum compaction up to the edge of walls or curbs.

- › Hydraulic transmission system with independent motors for each roller.
- › Water tank capacity: 45l.
- › Accessibility to small spaces.
- › Handle with vibration absorption system.
- › Lifting point to facilitate loading and unloading.
- › Front LED lighting system.
- › Electric starting system.
